PRESALE
FIRST STAGE: $10,000,000

REFERRAL PROGRAM
FOR THE FIRST STAGE

INDIVIDUAL APPROACH
IN WHITELIST FORMAT

Users are provided with the opportunity to purchase NFTs ranging from $100 to $10,000 in equivalent $GRO at a price of 0.1$ per token.

0,1 $

$GRO tokens are subject to a vesting period: you will receive 30% during the Token Generation Event (TGE), and the remaining 70% will be distributed equally in 10% increments monthly over the next 7 months.

Expand the GROWORLD community and earn rewards!
Use your referral link (click "Referral program") to invite people to the bot.

When your referrals purchase $GRO tokens, you earn an additional 10%. Referral rewards are paid in $GRO tokens.

1st Line   **10 %**

Invite as many friends as possible and become the top referrer! Each week, the top referrers will receive a bonus. Check your rating in the "Referral Rating" section!

NFTs received for participating in the referral program during Presale 1 will be converted into $GRO tokens based on the originally allocated token amount per user. Converted $GRO tokens will be distributed during the Token Generation Event (TGE), and the exchanged NFTs will be burned.

PRESALE
SECOND STAGE: $20,000,000

- **TOKEN PURCHASE ON THE WEBSITE**
- **TOKEN PURCHASE THROUGH THE BOT**

Users are provided with the opportunity to purchase NFTs ranging from $100 to $10,000 in equivalent $GRO at a price of 0.2$ per token.

0,2 $

$GRO tokens are subject to a vesting period: you will receive 30% during the Token Generation Event (TGE), and the remaining 70% will be distributed equally in 10% increments monthly over the next 7 months.

REFERRAL PROGRAM

CONCENTRATED LIQUIDITY FOR $ GRO ON ARBITRUM: A DEFI REVOLUTION

🦄 In DeFi, the concept of Concentrated Liquidity, as introduced in Uniswap V3, allows LPs to optimize profits by focusing on specific price ranges.

Enhanced capital efficiency:
By concentrating liquidity within certain price ranges, LPs can provide the same level of liquidity with less capital, resulting in higher capital efficiency.

Increased earning potential:
Concentrated liquidity enables LPs to earn more fees with less capital, as trading activity is concentrated within their chosen price range.

Customizable risk management:
LPs can adjust their risk exposure by selecting price ranges that align with their market outlook and risk tolerance.

Dynamic rebalancing:
LPs can adjust their price ranges according to market conditions, enabling more dynamic and responsive liquidity management.

Telegram Open Network

This is not just entertainment anymore, this is a whole new level of gaming experience!

The integration of GROWORLD with the Telegram Open Network (TON) enables leveraging all the advantages of this cutting-edge blockchain platform.

WHAT IS BITCOIN DEFI?

What is Stacks?

Stacks is an L2 solution that enables smart contracts and dApps to use Bitcoin as a secure base layer. It expands the functionality of Bitcoin, making it more programmable.

Benefits of Stacks:
- Bitcoin compatibility: BTC is used as a governance and payment token in dApps.
- Scalability: The L2 solution allows for handling more transactions.
- User-friendly: Accessible to developers and users.

Launch of sBTC:
- Opens up new possibilities for using Bitcoin in dApps.

Stacks Consensus:
- Proof-of-Stake (PoS) ensures security and energy efficiency.

Data storage:
- Hashing and storing data in Bitcoin L1 ensures immutability and verifiability.

$GRO is the first meme token in the GROWORLD multiverse, embodying the power of a small creature with a big mission and hidden potentials!

A total of **999,999,999** $GRO tokens are created in the ERC-20 standard on the ETH Arbitrum L2 network.
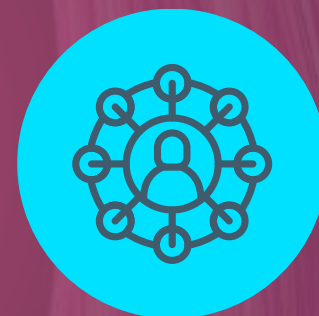

GROWORLD is a unique virtual space and ecosystem.

The $GRO token utilizes optimistic rollups to enhance speed, scalability, and cost-effectiveness.

In the Arbitrum network, similar to Ethereum, transaction fees are paid in ETH. However, transfers on the Arbitrum network are on average 90-95% cheaper than on Ethereum.
