

# GROWORLD

**STAKING DESCRIPTION**

<https://groworld.asia>

# **LIQUID STAKING IN GROWORLD:** **RECEIVE REWARDS AND MANAGE ASSETS FLEXIBLY.**

GROWORLD provides an extensive staking program with multiple opportunities to earn rewards for your \$GRO tokens. This article explores various staking pools, reward systems, and distinctive features like transferring staking shares using NFTs.

## **DISTRIBUTION \$250 MILLION GRO ALLOCATED FOR STAKING.**

50 million tokens allocated for referral rewards (20%)

150 million tokens allocated for interest rewards (60%)

50 million tokens available for purchase and staking in the account at a rate of \$0.3 per \$GRO token (20%).

# TWO STAKING OPTIONS ARE ACCESSIBLE: LOCKED STAKING AND FLEXIBLE STAKING.

A.

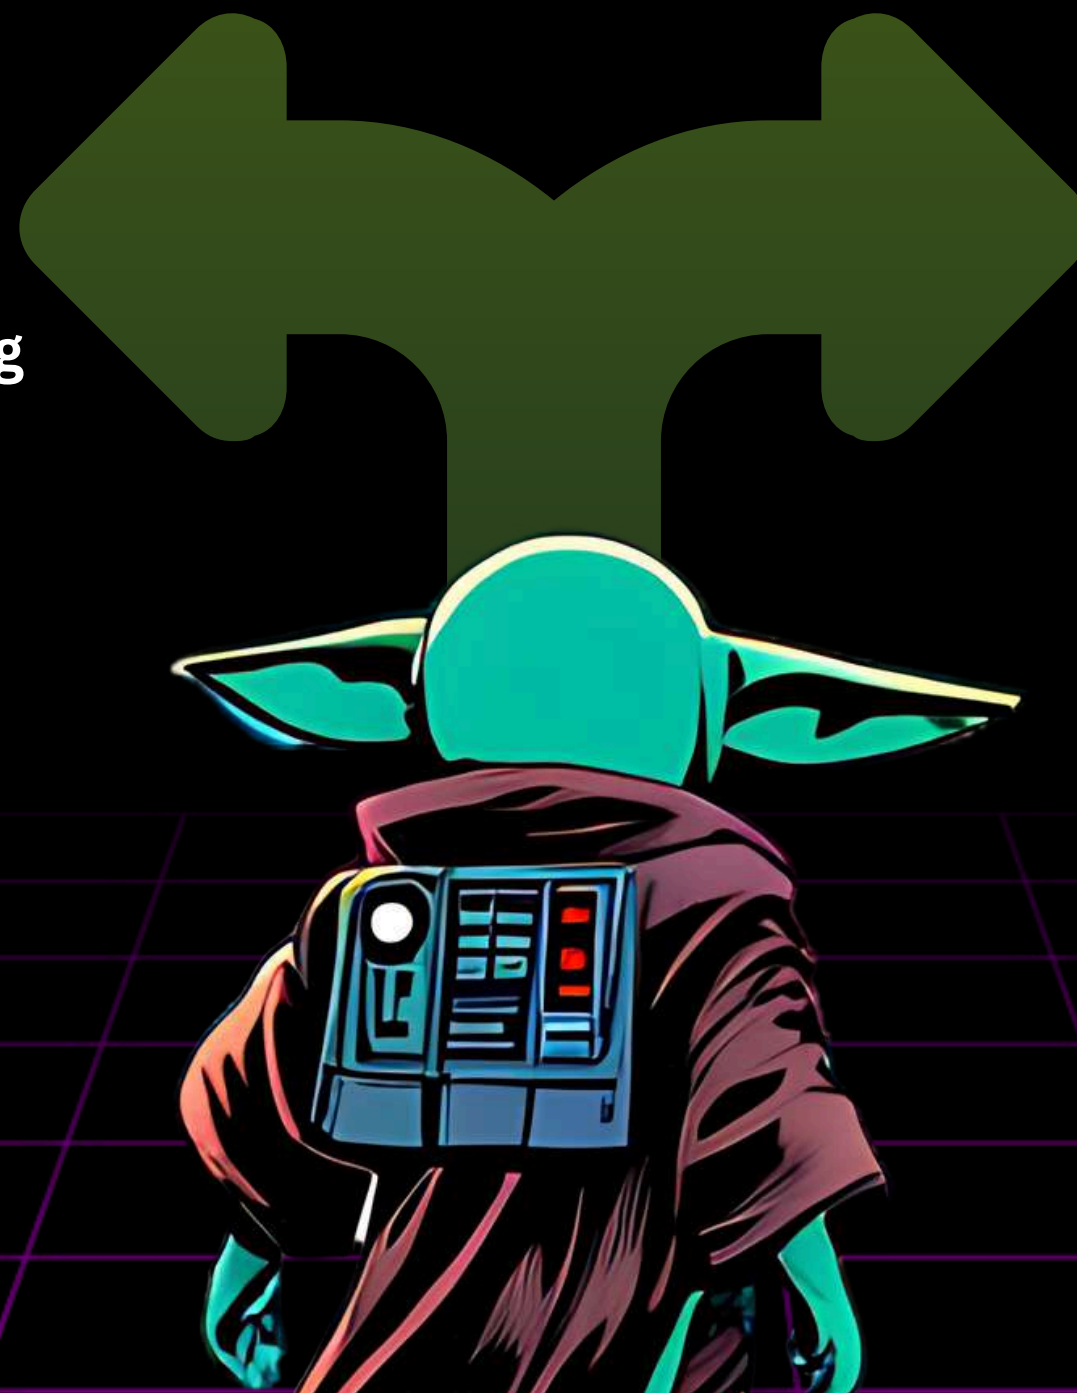

## Staking restriction

Locked staking provides greater rewards compared to flexible staking, necessitating users to lock their tokens for a specific duration. Unlike flexible staking, users are unable to unlock and withdraw their tokens until the staking period concludes.

B.

## Adaptable staking

Flexible staking enables users to lock their tokens for a set duration, with the option to unlock and withdraw them before the staking period concludes. However, it offers lower rewards compared to fixed staking.

# REWARDS FOR ADAPTABLE STAKING:

Rewards for engaging in flexible staking vary based on the staking duration.

- 3 months: 2.5% per month or **7.5%** total
- 6 months: 5% per month or **30%** total
- 12 months: 10% per month or **120%** total
- 24 months: 15% per month or **360%** total

*\*1 month is considered to be a period of 30 days*

# BLOCKED STAKING REWARDS:

Rewards for engaging in locked staking vary based on the staking duration:

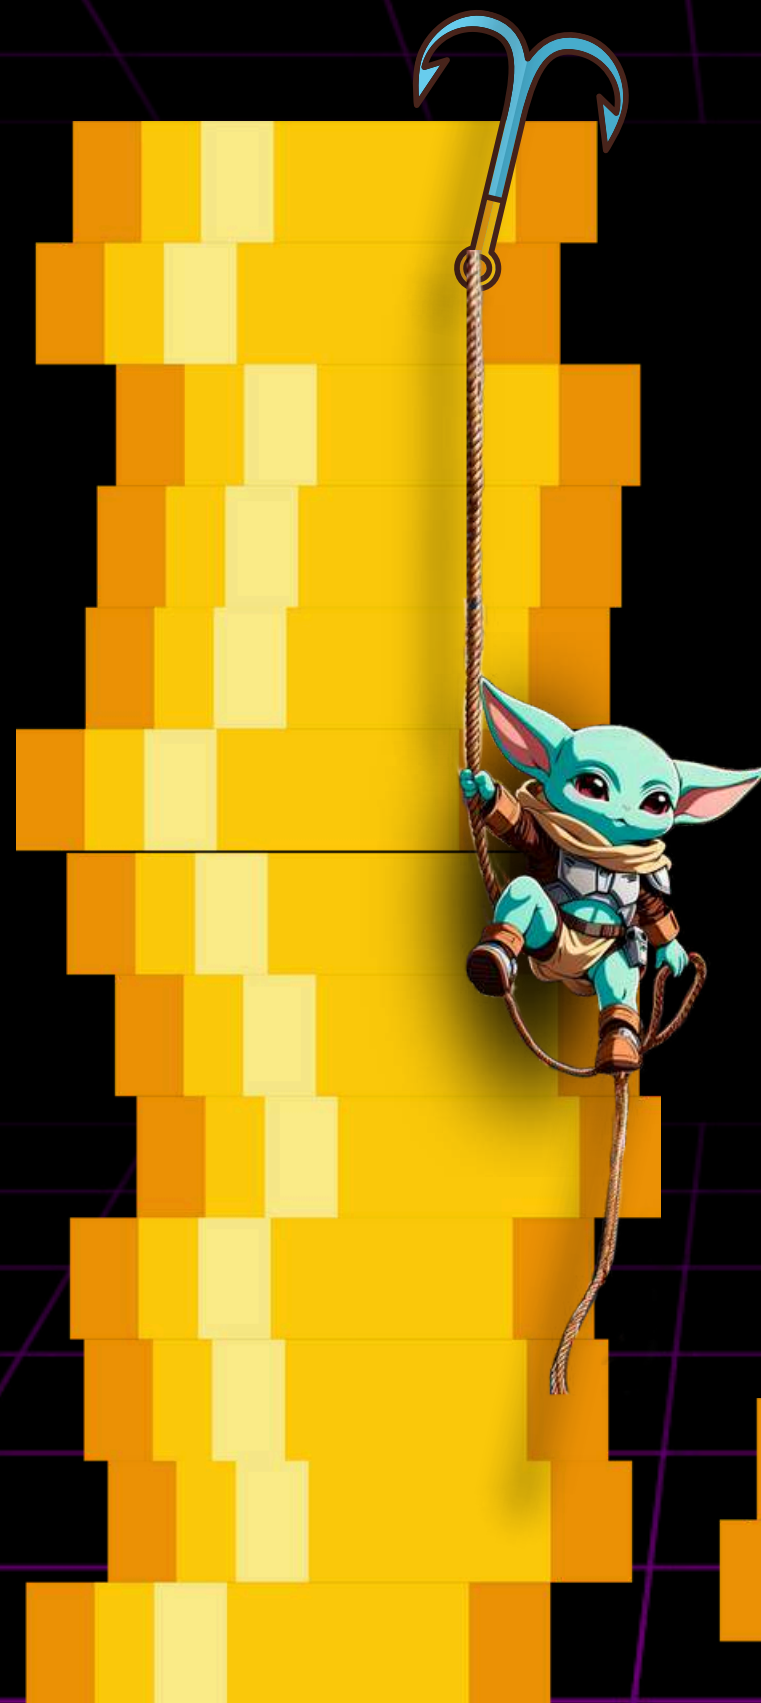

- 3 months: 10% per month or **30%** total
- 6 months: 13% per month or **78%** total
- 12 months: 15% per month or **180%** total
- 24 months: 20% per month or **480%** total

**\*1 month is considered to be a period of 30 days.**

## MAXIMUM STAKE LIMIT

The staking pool offers  
\$33330 GRO for a single  
user's wallet.

## MINIMUM STAKING THRESHOLDS

Flexible and locked staking  
options for a single user (wallet)  
are:

- 3-month subscription: 500 \$GRO
- 6-month subscription: \$2500 GRO
- 12-month subscription: 5000 \$GRO
- 24-month period: \$6667 GRO

# CONDITIONS FOR THE PREMATURE RETURN OF TOKENS

A 10-day unlocking period is set for staking with the option of early token return. It commences upon application submission for staking exit and continues until token return.

During this period, interest accrual and referral rewards cease upon submission of the application.

In addition to the 10-day token unlock period, early withdrawal penalties apply to flexible staking as follows:

- 3 months: 5%
- 6 months: 10%
- 12 months: 15%
- 24 months: 20%

The fine is determined by the staking amount, not the total staking amount and accumulated rewards.

*\*1 month is considered to be a period of 30 days*

# INCENTIVES AND SAFETY

The intelligent contract accurately logs all rewards acquired by the user up to the minute.

Users may initiate a reward claim ("Claim") once per second.

Partial withdrawal of accumulated rewards is not feasible. Users can solely withdraw the complete accumulated sum presently.

# GUIDELINES FOR PARTICIPATION:

To engage in staking, users can:

Utilize \$GRO tokens acquired during Presale 1 and Presale 2 for direct staking purposes.

Users can purchase and deposit \$GRO tokens into the staking account to engage in staking.

Utilize tokens acquired on decentralized or centralized exchanges after liquidity provision.

Users may stake tokens acquired from decentralized exchanges (DEX) or centralized exchanges (CEX) following the provision of liquidity.

GROWORLD offers users the chance to generate passive income by inviting new participants to the staking program.

Upon successfully inviting a new user to deposit \$GRO tokens into staking, you will receive a reward equal to 10% of their \$GRO deposit (for 1st level referrals). If your referral brings in another participant, you will receive an extra reward equivalent to 4% of the new participant's deposit (for the 2nd level of referrals) and so forth.

- Users can earn rewards up to 3 referral levels by staking for 3 months.
- Staking for a period of 6 months enables users to earn rewards across 6 referral tiers.
- Users can earn rewards across 8 referral levels by staking for 12 or 24 months.

## REFERRAL STAKING INITIATIVE

	3 months	6 months	12 months	24 months
First Tier	10%	10%	10%	10%
Level 2	4%	4%	4%	4%
Level 3	2%	2%	2%	2%
Level 4	-	1%	1%	1%
Level 5	-	1%	1%	1%
Level 6	-	1%	1%	1%
Level 7	-	-	0.5%	0.5%
Level 8	-	-	0.5%	0.5%

## PLEASE BE ADVISED THAT:

- **Receiving a Referral Link:**

**Users will only receive their staking referral link after staking \$GRO tokens.**

- **Premature withdrawal of staked tokens:**

**Referral rewards will be based on the user's longest active staking period if withdrawn prematurely.**

**For instance, if a user holds two staking deposits, one for 12 months and another for 3 months, and decides to withdraw tokens from the 12-month deposit before the maturity date, the reward tier will decrease from level 8 to level 3.**

**Conversely, should a user possess two staking deposits, one lasting 12 months and the other 24 months, withdrawing tokens prematurely from either deposit will not impact their referral level.**

- **Extension of the staking duration:**

**In order to sustain the referral rewards level post-staking period, users will need to extend the staking duration.**

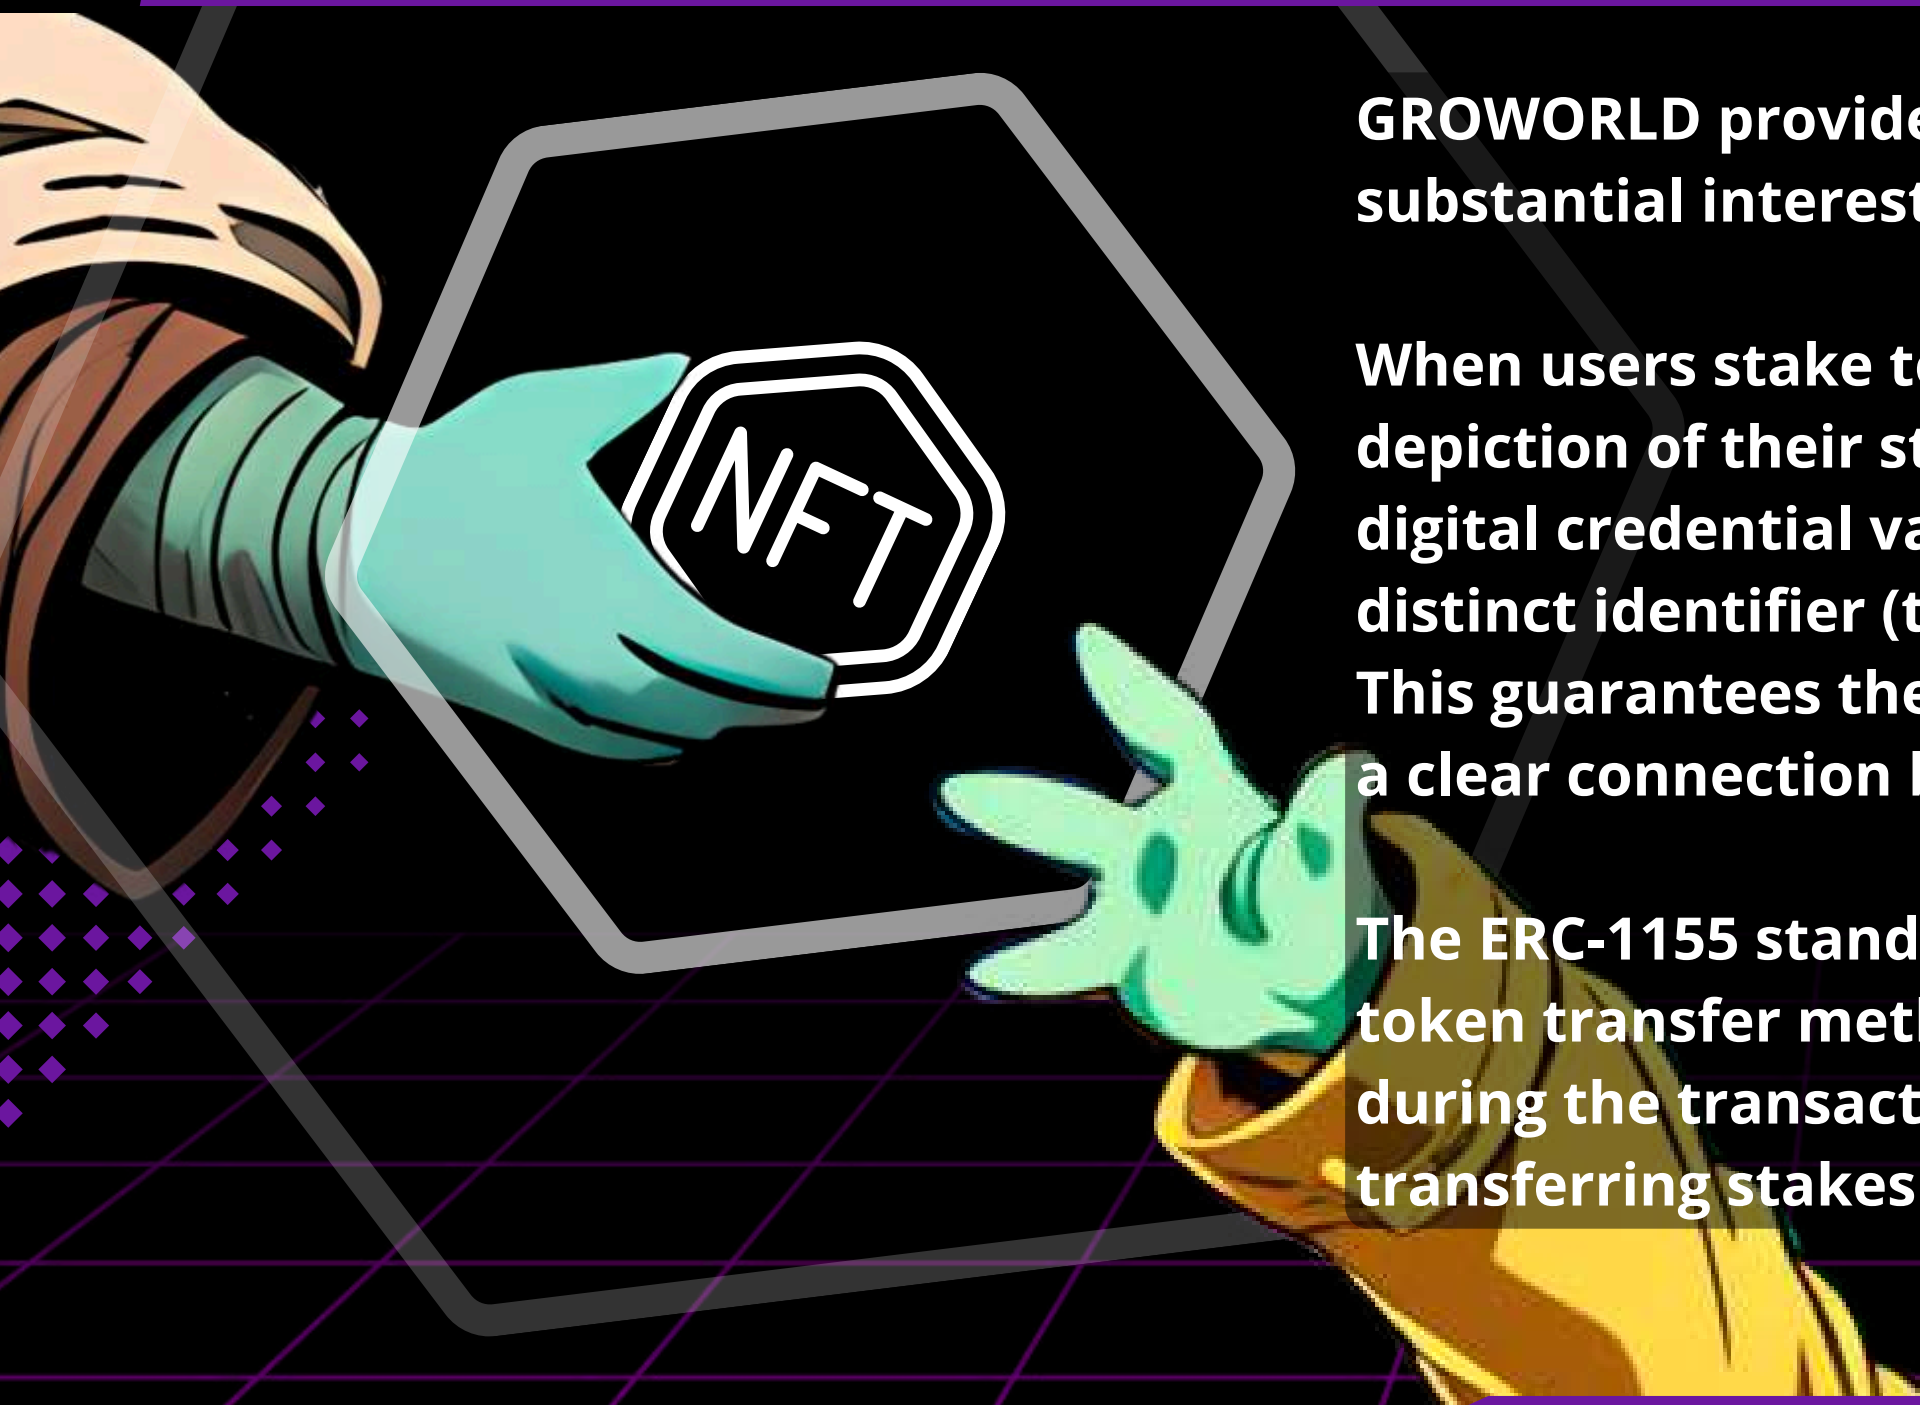

***\*1 month is considered to be a period of 30 days.***

# MECHANISM FOR TRANSFERRING STAKING SHARES THROUGH NFTS

**GROWORLD provides staking program participants with the chance to earn substantial interest rewards and effectively manage their assets with flexibility.**

**When users stake tokens via a smart contract, they are granted an exclusive depiction of their stake in the shape of an ERC-1155 NFT. This NFT acts as a digital credential validating possession of a particular staking amount with a distinct identifier (tokenId) linked to a specific staking pool within the contract. This guarantees the uniqueness and personalization of each stake, establishing a clear connection between the NFT and the relevant staking deposit.**

**The ERC-1155 standard is enhanced by incorporating a unique hook into the token transfer method, enabling the contract to execute supplementary actions during the transaction, thereby enhancing the flexibility and functionality of transferring stakes between users.**

# AN INSTANCE OF TRANSFERRING A STAKE IN A LIQUID NFT STAKING POOL AND CALCULATING REWARDS:

User #1 deposits 1000 tokens in staking for 10 months at 10% per annum. The anticipated total reward for staking is **100 tokens**. After three months, User #1 opts to transfer 500 tokens to User #2. User #1 earns 30 tokens in staking over three months.

*\*1 month is considered to be a period of 30 days.*

After transferring the stake:

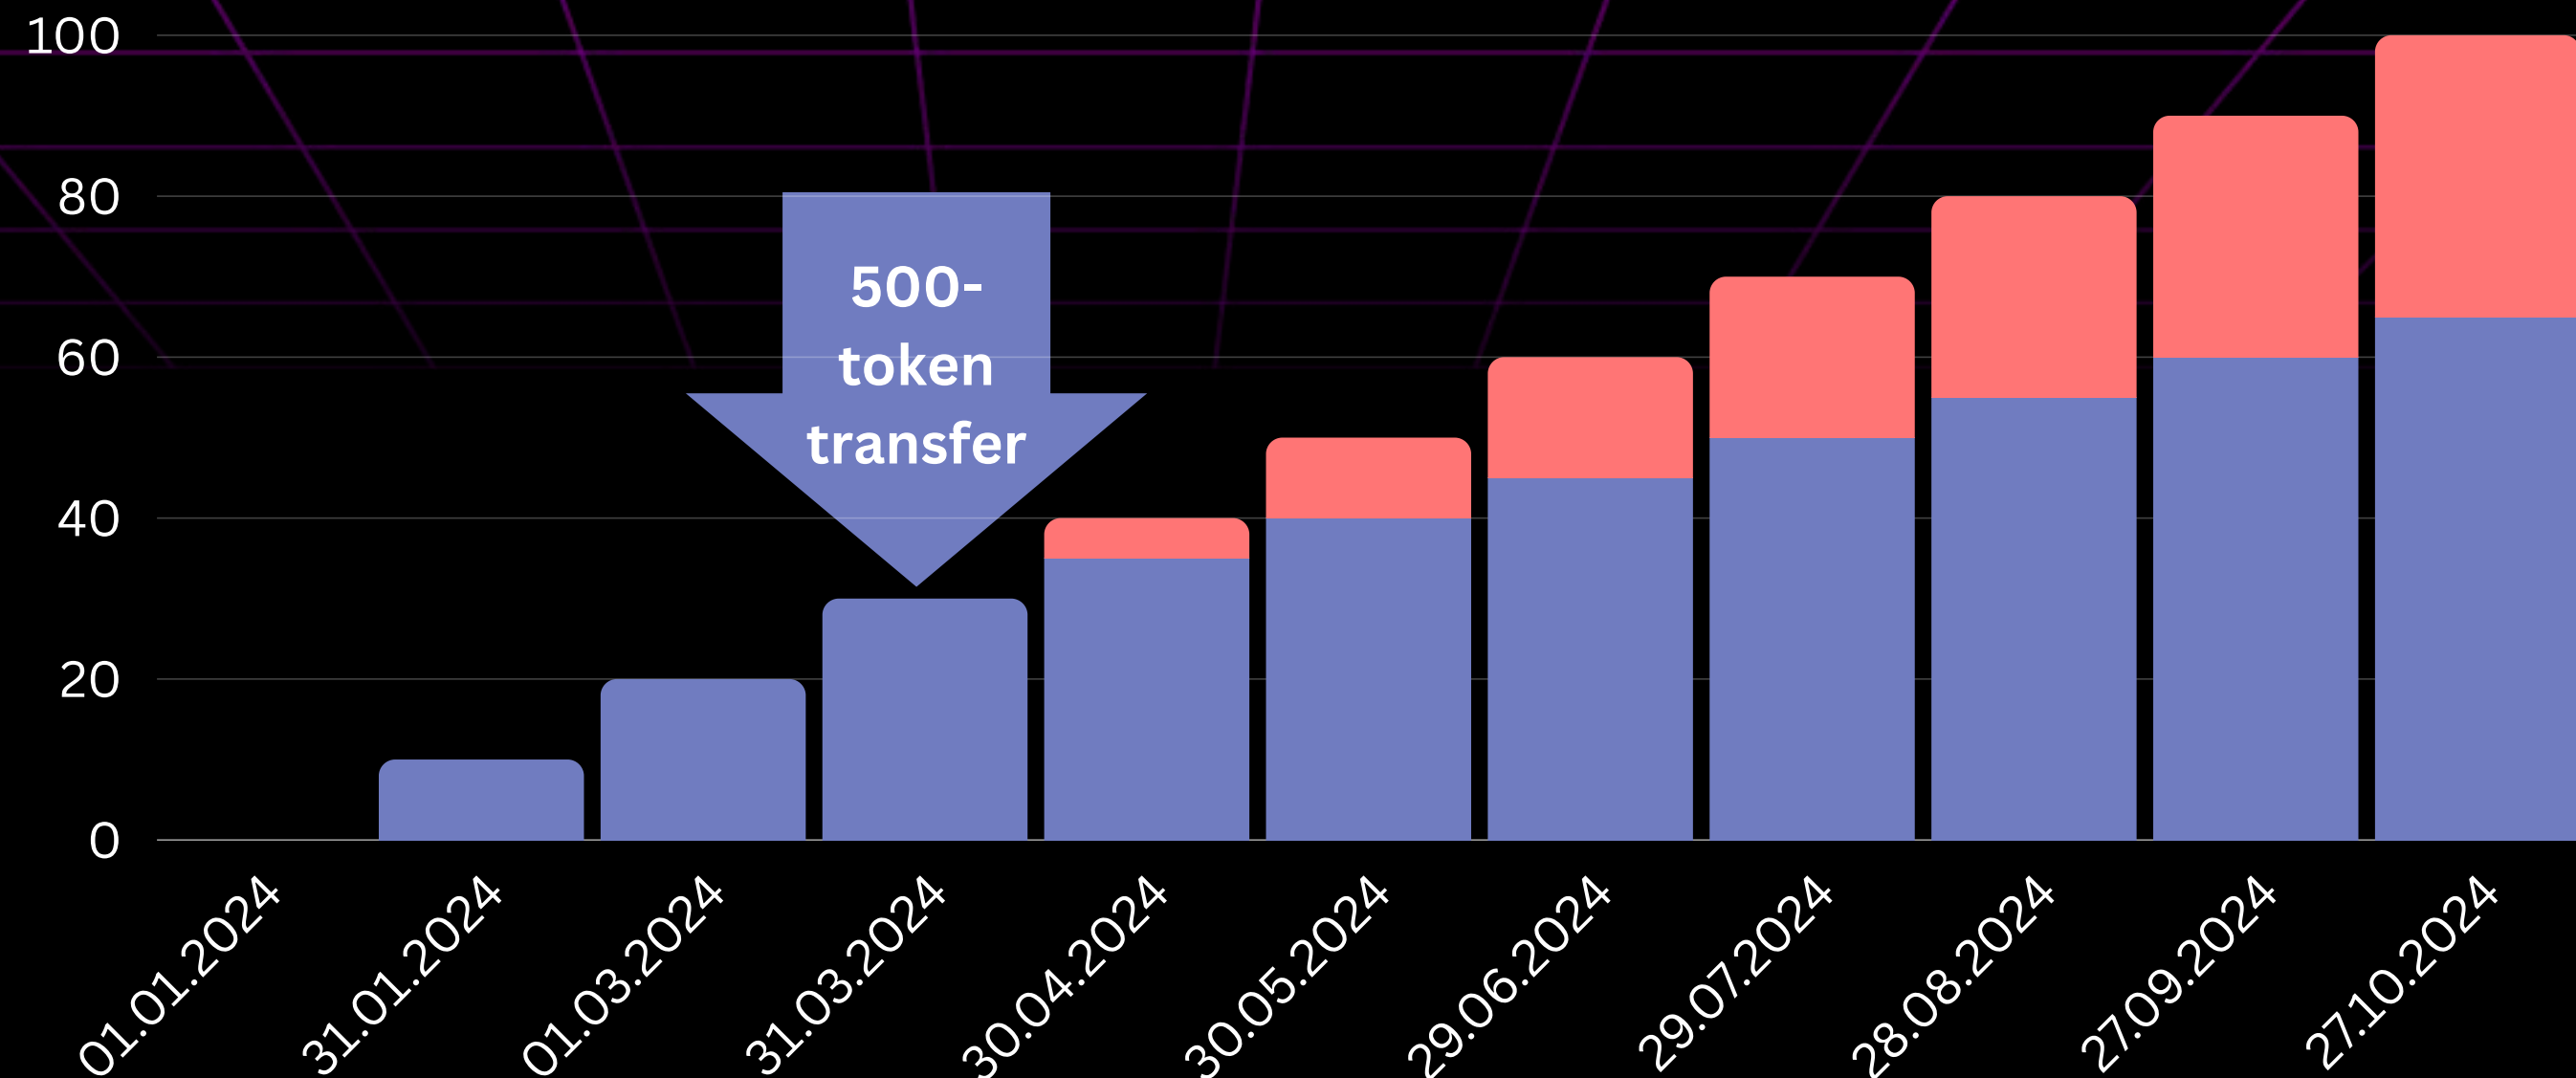

**User #1:**  
Stake: 500 tokens  
Anticipated reward: 65 tokens (30 tokens for the first 3 months + 35 tokens for the remaining 7 months)

**User #2:**  
Stake: 500 tokens  
Anticipated reward: 35 tokens (5 tokens monthly for 7 months)

Total staking rewards after 10 months: **100 tokens** (distributed to users).

**Therefore, the overall staking rewards amount stays constant, yet it is divided between the two users based on their involvement and staking duration.**

**\*1 month is considered to be a period of 30 days.**

*Note:*

*Receiving an NFT stake will not elevate the referral level of a user who acquired the stake from another user.*

*Transfer of ownership of the staking share to the null address is prohibited during the transfer of the staking share.*
